

Floralife® Hydraflor 100 – Clear

hydrating solution

Floralife® Hydraflor 100 is a hydrating solution, used after cut flowers have been harvested or transported waterless

For Growers, Wholesalers & Bouquet Makers

Effect

- contains acidifiers to adjust the pH of the water
- keeps the stems 'plumbing' free flowing
- inhibits and removes stem blockage
- can be used on all flower varieties
- increases hydration
- prevents limp leaves, bent neck and flower scrap
- effective at room temperature and in refrigeration
- highly concentrated and cost-effective
- clear in all water types

For Wholesalers, Bouquet Makers & Florists

Effect

- contains acidifiers to adjust the pH of the water
- appropriate amount of nutrients to prevent premature bud opening
- keeps the stems 'plumbing' free flowing
- can be used on all flower varieties
- reduces scrap and credits
- effective at room temperature and in refrigeration
- can also be used to soak floral foam
- highly concentrated and cost-effective
- clear in all water types

Directions for use

- remove foliage that will be below the solution level in the container
- recut flower stems with a sharp knife
- make sure that stems and containers are clean (for cleaning containers we recommend to use Floralife® Cleaner)
- cut flowers should remain in Floralife® Hydraflor 200 solution during transport up to selling to end consumer; change solution at least once a week
- after treatment with Floralife® Hydraflor 200 we recommend to use Floralife® Hydraflor 300 for a full blooming

Dosage 1:100 (1 %)

- dispense 10 ml Floralife® Hydraflor 200 per one litre of water (handpump: 1 stroke per litre of water)
