

OASIS® Postharvest 200 – Clear
storage solution

OASIS® Postharvest 200 is an excellent choice for high volume users to keep flowers fresh during transport and storage

For Wholesalers, Bouquet Makers & Florists

Effect

- contains acidifiers to adjust the pH of the water
- appropriate amount of nutrients to prevent premature bud opening
- keeps the stems 'plumbing' free flowing
- can be used on all flower varieties
- reduces scrap and credits
- effective at room temperature and in refrigeration
- can also be used to soak floral foam
- highly concentrated and cost effective
- clear in all water types

Floralife Europe GmbH

Directions for use

- remove foliage that will be below the solution level in the container
- recut flower stems with a sharp knife
- make sure that stems and containers are clean (for cleaning containers we recommend to use Floralife® Cleaner)
- cut flowers should remain in OASIS® Postharvest 200 solution during transport up to selling to end consumer; change solution at least once a week
- after treatment with OASIS® Postharvest 200 we recommend to use OASIS® Postharvest 300 for a full blooming

Dosage 1:100 (1 %)

- dispense 10 ml OASIS® Postharvest 200 per one litre of water (handpump: 1 stroke per litre of water)
