### Directions for Use

Floralife Rose & Gerbera Pre-Treatment (PRG) is intended to be used by growers as a pre-treatment for cut flowers. This product is to be used as a fresh flower pre-treatment for floriculture application only. Place the flowers in the solution containing PRG immediately after cutting or processing. Keeps stems free flowing.

### Dosage

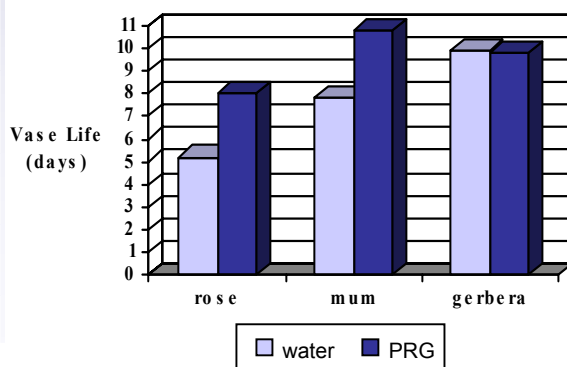

1 Tablet per 4 liters of water

### Available sizes

| <u>Item#</u> | <u>Size</u>   | <u>Net Wt.</u>  | <u>ready-to-use solution</u> |
